THE STARS FORETOLD THE DOOM OF AUTOCRACY

By FRANK THEODORE ADLER
Director Astrological Society, Washington, D. C.

Aug. 21, 1914, just as the war had started to break out, a new moon was visible all over Europe and cast its shadow upon the western parts of Russia and sections of Roumania, Austria-Hungary and Germany. This shadow was followed by a very luminous eclipse of the moon, and it is believed that this foretold the doom of the autocracy.

The geographical distribution of the eclipse was such that it was visible over the whole world, and it was seen in all parts of Europe and Asia. The eclipse was followed by a very luminous shadow, which was cast over the western parts of Russia and sections of Roumania, Austria-Hungary and Germany. This shadow was followed by a very luminous eclipse of the moon, and it is believed that this foretold the doom of the autocracy.
